DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6-10, 14, 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al. (2002/0084833).

With respect to claims 1, 2, 6-10, 14, 15, 19 and 20, Kim et al. disclose, in Figs. 3 and 4, a circuit comprising: "a detector (100)"; "a first reference voltage (voltage at bottom terminal of Rn relative to VREF)"; "second reference voltage (voltage at top terminal of R1 relative to VREF)"; "a first sensing signal (Det n)"; "a second sensing signal (Det 2)"; "a controller (300)"; "an action signal (PUL)"; "a sub-booster (40-n)"; "a main booster ("40-2)"; and "a voltage adder (node providing VPP)", all connected and operating similarly as recited by Applicant.

With respect to claims 16-18, clearly the above circuit to Kim et al. will provide the recited method.
